B. Learning	40
C. Memory	41
D. Problem Solving and Creativity	42

FOREWORD

This is a selected bibliography of references taken from a key-sort file of 45,000+ references. This file is established in the Andrus Gerontology Center, compiled from commercially-available data bases and published sources relevant to gerontology. The data bases consisted of BA Previews (*Biological Abstracts* and *BioResearch Index*), MEDLINE/MEDIARS (*Index Medicus*), PASAR (*Psychological Abstracts*), Drug Abuse Information Center, Brain Research Information Service, *Sociological Abstracts* (1963-1967), *International Political Service Abstracts*, ERIC, NTIS and NEXUS. The published sources were primarily compiled from the entire file of Dr. Nathan Shock's "Current Literature in Gerontology and Geriatrics" published in each issue of the JOURNAL OF GERONTOLOGY, FROM 1959-1974 and various announcement services, such as PUBLISHERS' WEEKLY, MONTHLY CATALOG OF U.S. GOVERNMENT PUBLICATIONS, MONTHLY CHECKLIST OF STATE PUBLICATIONS, DISSERTATION ABSTRACTS, etc. All references were originally entered into the key-sort file without editing or checking.

For this bibliography, all references of questionable accuracy were checked or deleted as the verification process was performed. Most of the references were selected from 1959-1974. However, some earlier ones were included if they were regarded as significant in the area of study. English-language references were stressed in the selection criteria but foreign titles containing unique data were not excluded. In many cases the titles have English abstracts for the convenience of the reader.

Many of the references listed herein can be obtained through a library or the interlibrary loan system. They are not necessarily available from the Andrus Gerontology Library at the University of Southern California. In some cases, the books may still be in print and can be purchased through a local bookstore or jobber. For journal articles, the full name of the issuing journal has been spelled out to aid in the acquisition of the item through their own library.

We wish to thank the bibliography staff for their help in making this bibliography possible.

B. Theoretical Implications of Intellectual Development

1. Piagetian concepts of development

- Denney, N. W. & Lennon, M. L. Classification: A comparison of middle and old age. *Developmental Psychology*, 1972, 7, 210-213.

- Denney, N. W. Evidence for developmental change in categorization criterion for children and adults. *Human Development*, 1974, 17, 41-53.
- Keasey, C. T. The nature of formal operations in preadolescence, adolescence and middle age. Unpublished doctoral dissertation, University of California, Berkeley, 1970. (*Dissertation Abstracts International*, 1971, 31, 7574.)
- Kominski, C. C. & Coppinger, N. W. The Mueller-Lyer illusion and Piaget's test for the development of conservation of space in a group of older institutionalized veterans. Unpublished paper, William and Mary College, Williamsburg, Va., 1968.
- Papalia, D. E. The status of several conservation abilities across the life-span. *Human Development*, 1972, 15, 229-243.
- Papalia, D. E. The status of some conservation abilities across the life-span. Unpublished doctoral dissertation, West Virginia University, 1971. (*Dissertation Abstracts International*, 1972, 32, 4901.)
- Papalia, D. E., Kennedy, E., & Sheehan, N. Conservation of space in non-institutionalized old people. *Journal of Psychology*, 1973, 84, 75-79.
- Riegel, K. F. Dialectic operations: The final period of cognitive development. *Human Development*, 1973, 16, 346-370.
- Rubin, K. H. Decentration skills in institutionalized and noninstitutionalized elderly. *Proceedings of the American Psychological Association*, 1973, 81, 763-764.
- Rubin, K. H., Attewell, P. W., Tierney, M. C., & Tumolo, P. Development of spatial egocentrism and conservation across the life span. *Developmental Psychology*, 1973, 9, 432.
- Storck, P. A., Loof, W. R., & Hooper, F. H. Interrelationships among Piagetian tasks and traditional measures of cognitive abilities in mature and aged adults. *Journal of Gerontology*, 1972, 27, 461-465.

- Tomlinson-Keasey, C. Formal operations in females from eleven to fifty-four years of age. *Developmental Psychology*, 1972, 6, 364.
- Walesa, C. (An attempt to apply Piaget's theory in the interpretation of the intellectual development of adults.) *Rozniki Filozoficzne*, 1971, 19, 23-40.

2. Differences due to methodology

- Bajema, C. J. A note on the interrelations among intellectual ability, educational attainment, and occupational achievement: A follow-up study of a male Kalamazoo public school population. *Sociology of Education*, 1968, 41, 317-319.
- Baltes, P. B. Longitudinal and cross-sectional sequences in the study of age and generation effects. *Human Development*, 1968, 11, 145-171.
- Baltes, P. B. (Longitudinal and cross-sectional sequences in the study of age and generation effects.) Unpublished doctoral dissertation, University of Saarland, West Germany, 1967. (*Dissertation Abstracts International*, 1970, 31, 2951.)
- Baltes, P. B. & Labouvie, G. V. Adult development of intellectual performance: Description, explanation, and modification. In C. Eisdorfer & M. P. Lawton (Eds.), *The psychology of adult development and aging*. Washington, D. C.: American Psychological Association, 1973, 157-219.
- Bauer, B. (Results and problems of intelligence testing of aging subjects.) *Probleme und Ergebnisse der Psychologie*, 1966, 16, 21-39.
- Bell, B., Rose, C. L., & Damon, A. The Veterans Administration longitudinal study of healthy aging. *Gerontologist*, 1966, 6, 179-184.

- Berkowitz, B. & Green, R. F. Changes in intellect with age. V. Differential change as functions of time interval and original score. *Journal of Genetic Psychology*, 1965, 107, 179-192.

THE ETHEL PERCY ANDRUS GERONTOLOGY CENTER

The Gerontology Center was established in 1964 for the purpose of creating a special environment for training and research in human development and aging. In 1971 it became the Ethel Percy Andrus Gerontology Center in honor of the founder of the National Retired Teacher's Association, The American Association of Retired Persons and an alumna of the University of Southern California.

Over 400,000 members of the organizations founded by Dr. Andrus contributed generously toward the construction of the 88,000 square foot, three story brick building on the west side of the campus. Alumni, philanthropic foundations and friends of USC also contributed substantially to the establishment of the Andrus Center, which was dedicated in February, 1973.

The operations of the Andrus Center may be divided into three principal areas:

1. The Research Institute which initiates, designs, and executes research on the many phases of aging.
2. Community Programs is directed to continuing professional education in various aspects of aging.
3. The Leonard Davis School of Gerontology, opening in September, 1975, will provide a curricula for the undergraduate education and training of personnel to meet growing needs in the expanding field of aging.

The harmonious integration of these operations will contribute to progress in many directions in the years ahead.
